

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1-9. (Cancelled)

10. (Currently Amended) An insulated refrigeration panel assembly comprising:
- a first skin;
 - a second skin spaced generally parallel to said first skin;
 - a first insulating body sandwiched between said first skin and said second skin, said first skin, said second skin and said first insulating body forming a first panel unit;
 - a first flexible snap fit connector arranged to engage a first mating connector along a first direction, said first flexible snap fit connector attached to said first panel unit;
 - a second flexible snap fit connector arranged to engage a second mating connector along a second direction transverse to said first direction, said second flexible snap fit connector attached to said first panel unit wherein said first flexible snap fit connector and said second flexible snap fit connector comprise at least one of said first skin, said second skin, and said first insulating body; and
- wherein said first panel unit comprises a first body and a second body, said first body defining a first part of said first flexible snap fit connector and said second body defining a second part of said first flexible snap fit connector, said first body separable from said second body, wherein both said first body and said second body are in contact with said first mating connector.

11-18. (Cancelled)

19. (Currently Amended) An insulated refrigeration panel assembly, comprising:
a first panel unit comprising a first skin, a second skin spaced generally parallel to said first skin, and a first insulating body sandwiched between said first skin and said second skin;

a second panel unit comprising a third skin, a fourth skin spaced generally parallel to said third skin and a second insulating body sandwiched between said third skin and said fourth skin;

a third panel unit comprising a fifth skin, a sixth skin spaced generally parallel to said fifth skin and a third insulating body sandwiched between said fifth skin and said sixth skin;

wherein said first panel unit comprises a first flexible snap fit connector and said second panel unit comprises a first mating connector, said first flexible snap fit connector engaging said first mating connector along a first direction;

wherein said first panel unit comprises a second flexible snap fit connector and said third panel unit comprises a second mating connector, said second flexible snap fit connector engaging said second mating connector along a second direction transverse to said first direction; and

wherein said first panel unit comprises a first body and a second body, said first body defining a first part of said first flexible snap fit connector and said second body defining a second part of said first flexible snap fit connector, wherein said first body and said second body flexibly engage said first mating connector.

20-22. (Cancelled)

23. (New) The insulated refrigeration panel assembly of Claim 10 wherein said first body is pressed against said second body to form said first snap-fit connector.

24. (New) The insulated refrigeration panel assembly of Claim 10 wherein said first body has a first flexible portion and said second body has a second flexible portion, said first flexible portion and said second flexible portion both engageable to said first mating connector.

25. (New) The insulated refrigeration panel assembly of Claim 10 wherein said first body and said second body define at least a portion of a receiving cavity for receiving said first mating connector.
